WOLF PACK

POWERED BY indigo theory

PROBLEM

“[The city] put good money behind bad ideas — a lot of times they do that because they don’t talk to the people who are experiencing homelessness,”

JERRY BURTON, DENVER HOMELESS OUTLOUD - DENVER BUSINESS JOURNAL

RESEARCH

7 Nonprofits interviewed + 2 Surveys collected + 3 Conferences attended + 3 Case studies researched + 3 City council meetings = 100hrs+ UX Research

HOMELESS JOE

- Chronically homeless
- No form of identification
- No bank account
- No accessible labor market
- Vulnerable to wage theft
- Learned helplessness
- No civic engagement or social capital

WOLF PACK

A token based gig economy that provides an accessible labor market, identification, work history, personalized wallet, wage theft protection, and financial empowerment to the homeless.

- Project name

Wolf Pack

- Team members first names, last names, and Discord handles:

Alexandra Gardner, William Sterling, Konstantin Papkovskiy, Arnaud Konan

- Detailed project description (no more than 4 sentences)

Wolf Pack is a token based gig economy that provides an accessible labor market, identification, work history, personalized wallet, wage theft protection, and financial empowerment to the homeless. By creating a connected relationship between the homeless population and the community in which they reside, Wolf Pack aims to solve a growing problem with a human centered design approach.

- A YouTube link of your demo or presentation (under 6 minutes in length)
- Track you're submitting to (only choose one between Open/Impact)

Impact Track

- Project Bounties you're submitting to (up to 10)

Fortmatic, Pepo UX Award, Chainlink Judge's Choice, DappHero

- A link to all your source code on a public repo (e.g. Github)
